This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THE MINING RECORD OFFICE.

Considerable loss of capital has frequently resulted from attempts to mine in localities, where a little knowledge of what had been previously done would have shown there was small prospect of success. Through ignorance of the existence or exact extent of old and deserted mine-workings, great danger to the miner is not uncommonly incurred, and human life has been frequently sacrificed. The preservation of Mining Records has for one of its objects the prevention of such loss of life and of property.

A large collection of plans and sections of mines, and important statistical details, are deposited in this Office, under the superintendence of the Keeper of the Mining Records. They are made available for the instruction of students, and may be consulted by those who are interested in the mineral productions of the United Kingdom.

Another and perhaps the most important object of this office is the collection and annual publication of the "Mineral Statistics of the United Kingdom."

Keeper of Mining Records.—ROBERT HUNT, F.R.S.

Assistants { RICHARD MEADE.

NOTICE.

In the "Notice" to the MINERAL STATISTICS for 1871, I expressed my hopes, that under the operation of the Acts of Parliament relating to collieries and metal mines, the returns would be obtainable more promptly, and the publication of the "Statistics" therefore take place earlier than in former years.

These hopes have not been realized. Some of the returns from the metal mines have only been received within the last few days, and, owing to the wording of a clause in the Coal Mines Regulation Act, the returns from the collieries have not been at all available for the purposes of the Mining Record Office, as is explained in the Introduction.

As the "MINERAL STATISTICS," which are published by order of the Lords of the Treasury, has long been regarded, both in this country and abroad, as the standard for reference on all questions connected with the mineral produce of the United Kingdom, it is hoped and believed that some well considered plan for overcoming the existing difficulty will be devised before the time arrives for collecting the returns for the present year.

13th December 1873. ANDREW C. RAMSAY.

INTRODUCTION.

When the "Mineral Statistics for 1871" were issued, hopes were expressed that the returns for 1872 would be published at an earlier period than those for that year had been, and that the "Statistics" in future,—by the operation of the new Acts relating to mines and collieries,—would be yet more exact than they had hitherto been. These hopes have not, however, been realized. "*The Metalliferous Mines Regulation Act*, 1872," fixes unfortunately, the first day of August, as the period when the returns of produce are to be made to the inspector, although all the ores raised in the previous year will have been dressed and sampled, and sold many months earlier.* This year (1873) many of the returns have not been sent to the inspector from the mines until late in November. This explains one of the causes which have prevented an earlier issue of the "*Mineral Statistics for* 1872." Again, the Act requires only a return of the *ores* raised. As such a return would not convey any useful information, it became necessary,—in nearly every case,—to obtain either the value of the ores, or their per-centage produce of metal. This has occasioned considerable additional labour in visiting the mines, or in corresponding with the managers of mines and others. For the ores raised in Cornwall and Devonshire it has been thought advisable to publish the returns made to the *Stannary Court*. These, together with the details of the "Public Ticketings" for copper ores in Cornwall and at Swansea, also published, will enable anyone to check the estimated quantities of metal produced and the values given.

As it respects coal, it has become a question, seeing how closely the progress of our manufacturing industries are connected with the production and cost of fuel, to determine, for each year, with all possible accuracy, the rate of increase in the production of coal from

---

* "THE METALLIFEROUS MINES REGULATION ACT, 1872."

CLAUSE 10.—"On or before the first day of August in every year the owner or agent of every mine to which this Act applies shall send to the inspector of the district, on behalf of a Secretary of State, a correct return, specifying, with respect to the year ending on the preceding thirty-first day of December, *the quantity of minerals sold*, or produced from such mine * * * * The return shall be in such form as may be from time to time prescribed by a Secretary of State, and the inspector of the district on behalf of a Secretary of State shall from time to time on application furnish forms for the purpose of such return. *Every* owner or agent of a mine who fails to comply with this section, or makes any return which is to his knowledge false in any particular, shall be guilty of an offence against the Act."

the collieries of the United Kingdom. Hitherto the quantity of coal raised, has been arrived at by issuing circular forms to all the coal owners, requesting a return to the Mining Record Office of the quantity of coal produced from each colliery. These returns have been, generally, freely given, *it being always very distinctly understood that they would be treated as confidential* and used only to compute the produce of districts. Up to 1871 these voluntary returns formed the basis upon which the returns of coal given in the "Mineral Statistics" were computed. Circumstances, beyond control, in 1871 rendered it imperative to adopt, instead, the returns which had been made to the Colliery Inspectors, and these gave a rate of increase above that which was the rate in previous years. Again, for the year 1872, under the operation of the "*Coal Mines Regulation Act*, 1872," the returns made by the Inspectors to the *Secretary of State for the Home Department* are the sources from which the production of coal given in the following pages are drawn, and the only sources available. The operation of Clause 38* of this Act is to limit the examination of those returns to the Inspectors and the Secretary of State. Consequently the Keeper of Mining Records has not been permitted to examine them, and he has no means of ascertaining whether or not errors have arisen in making those returns, or in the computation of the aggregates, when they are made. This has been done, in former years, with respect to the returns received by this office, in which errors have been often detected, by visiting the districts, and ascertaining on the spot, from every available source, the correctness or otherwise of the quantities given. The only means by which the Keeper of Mining Records is this year enabled to check the returns as they are now given, is by a cautious examination of

---

* "The Coal Mines Regulation Act, 1872."

Clause 38.—"On or before the first day of February in every year the owner, agent, or manager of every mine to which this Act applies shall send to the inspector of the district, on behalf of a Secretary of State, a correct return, specifying, with respect to the year ending on the preceding thirty-first day of December, the quantity of coal or other mineral wrought in such mine, and the number of persons ordinarily employed in or about such mine below ground and above ground, distinguishing the persons employed below ground and above ground, and the different classes and ages of the persons so employed whose hours of labour are regulated by this Act.

"The return shall be in such form as may be from time to time prescribed by a Secretary of State, and the inspector of the district on behalf of a Secretary of State shall from time to time on application furnish forms for the purpose of such return.

"The Secretary of State may publish the aggregate results of such returns with respect to any particular county or inspector's district, or any large portion of a county or inspector's district, but the individual return shall not be published without the consent of the person making the same, or of the owner of the mine to which they relate, and no person except an inspector or Secretary of State shall be entitled, without such consent, to see the same."

the distribution of the coal. This has been attempted on a more extended scale than usual. Returns have been most liberally furnished by the railways and canals; and the quantities of coal exported or sent coastwise have been obtained from the Parliamentary Returns. The value of these tables will be understood by all who thoughtfully examine them.

The difference between this and the 365,450 tons given above arises from the deficiency of returns from some of the smaller ports.

The total increase in the quantity of coal carried by railways and by canals in 1872, as compared with that distributed in 1871, as *shown in the returns obtained*, is, as stated, 4,305,617. There are some, not very important lines, carrying coal, from which returns have not been received, and we have no returns of the quantities carried by carts or private railways or trams, directly from the pit's mouth to the manufactory, or for the supply of towns. This, however, would not appear to have been largely increased over former years. The following computation of the coal used in our metallurgies, which is based upon information received

directly from the smelters and ironmasters, shows that in that direction the increase in consumption has been very small:—

Coal used in Smelting, Refining, Desilverizing, &c. of Metals in the United Kingdom.

		Total of Increase or Decrease -			371,605	365,532
		Actual Increase in the Coal consumed in the above Metallurgies in 1872 -			6,073	

The consumption of coal in the iron manufacture is computed, upon the information furnished to the Royal Coal Commission, at the rate of three tons of coal used, for all purposes, to each ton of *pig iron* produced For the year 1872, as will be seen in the "*Pig Iron Manufacture Return*," the MINING RECORD OFFICE has sought and obtained, for the first time, returns of the coal used from nearly all the blast furnace establishments. As the result of the economy which has been rigidly pursued since the advance in the price of coal, we have only 51 cwt. of coal given as used for each ton of pig iron produced. This will give the *quantity used in* 1872 *as* 17,191,918 tons only. As it is probable that the quantity given in 1871 is in excess, both years have been computed in the table at the same rate, for strict comparison.

The returns of coal produced, as given by the Inspectors, differ from those which appear in the Mineral Statistics for 1872, as shown below, by the addition of the coal raised in Ireland:—

—	Coal raised in the United Kingdom.	Increase.	Coal raised in Great Britain (Inspector's Return).	Increase.
	Tons.	Tons.	Tons.	Tons.
1871	117,352,028	—	117,439,251	—
1872	123,497,316	6,172,288	123,393,853	5,954,602

It has been shown that the increased quantity of coal carried by the railways is above 4,305,617 tons. It is thought, however, that the following estimation, made with great care, will have a very close approximation to the truth, as showing the TOTAL INCREASE:—

	Tons.
Railways and canals, 1872, increased - -	4,600,000
Exports, 1872, increased - - -	450,505
Iron and other metallurgies, 1872, increased -	6,073
The quantities used at collieries and in mines, *estimated* increase - - - -	10,000
Coal carted or sent by private rail or tram-roads, to ironworks, manufactures, and towns, which does not appear in the above returns, *estimated* increase - -	250,000
	5,316,578
Coastwise Shipments, decrease -	300,214
Actual *estimated* increase -	5,016,364

This leaves about one million tons of coal to be accounted for, which, out of the large quantity which we are now producing, may appear to be but a small amount. It is, however, hoped that such arrangements will be made in future years as will enable the

MINING RECORD OFFICE to present a yet more closely accurate return of the production and of the distribution of our fossil-fuel. To enable this to be properly accomplished, it is hoped that the coal owners will express upon the returns made to the inspectors, *their consent, according to the regulation of the Act*, that the Keeper of Mining Records shall "*see the same*," remembering that "*the individual return*" will be used only, that he, with the sanction of "*the Secretary of State, may publish the aggregate results of such returns.*"

GENERAL SUMMARY of the RETURNS of the MINERAL PRODUCE of the UNITED KINGDOM received by the MINING RECORD OFFICE in the Year 1872.

Number of Mines.	Mineral.	Quantities.	Value.
		Tons. Cwts.	£
3,001	COAL*	123,497,316 0	46,311,143
266	IRON ORE	16,584,857 0	7,774,874
117	COPPER ORE	91,983 0	443,738
162	TIN ORE	14,266 0	1,246,135
455	LEAD ORE	83,968 3	1,146,165
63	ZINC ORE	18,542 12	73,951

15	ARSENIC	5,171 15	17,964
3	WOLFRAM	88 5	993
1	COBALT	1 0	20
3	MANGANESE	7,773 0	38,865
1	FLUOR SPAR	80 12	40
5	OCHRES, UMBERS, &c.	3,326 15	8.227
1	BISMUTH ORE	2 0	—
1	CHLORIDE OF BARIUM	65 0	130
25	BARYTES	9,092 17	7,078
	CLAYS, Fine and Fire (*Estimated*)	1,200,000 0	450,000
	Other earthy Minerals (*Estimated*)	—	650,000
	SALT	1,309,497 10	654,748
	COPROLITES (*Estimated*)	35,000 0	50,000
	TOTAL VALUE of the MINERALS produced in the UNITED KINGDOM in 1872		58,913,541

* In the evidence given before the Select Committee of the House of Commons in 1873 on "the present dearness and scarcity of coal," it was said that the rise in wages added one shilling and sixpence to the cost of getting a ton of coal.

METALS obtained from the ORES enumerated, &c. in the UNITED KINGDOM in the Year 1872.

DESCRIPTION OF METAL.		Quantities.	Value.
			£
PIG IRON	Tons	6,741,929	18,540,304
COPPER	„	5,703	583,232
TIN	„	9,560	1,459,990
LEAD	„	60,455	1,209,115
SILVER	Ounces	628,920	157,230
ZINC	Tons	5,191	118,076
Other Metals (*Estimated*)		—	2,500
TOTAL VALUE of METALS produced from the ORES of the UNITED KINGDOM in the Year 1872			22,070,447

TOTAL VALUE of the METALS produced: COAL and other MINERALS raised, in the Year 1872.

	£
METAL, value of, as above	22,070,447
COAL do.	46,311,143
MINERALS, Earthy, &c.	1,811,826
TOTAL VALUE	70,193,416

The increase in TOTAL VALUE, amounting to 12,871,523*l.*, is chiefly due to the additional cost in "getting" each ton of coal.

ROBERT HUNT, F.R.S.,
Keeper of Mining Records.

Mining Record Office,
Museum of Practical Geology,
Jermyn Street, London,
December 19th, 1873.

MINERAL STATISTICS

OF THE

UNITED KINGDOM OF GREAT BRITAIN AND IRELAND

FOR THE YEAR 1872.

PART I.

METALLIFEROUS MINERALS.

In accordance with the "METALLIFEROUS MINES REGULATION ACT, 1872," the returns made from all the mines to the INSPECTOR are now, and will in future, be given in the MINERAL STATISTICS OF THE UNITED KINGDOM, by the authority of the *Secretary of State for the Home Department.* These are, for 1872, in some respects, imperfect, the return of "*the quantity of mineral sold or produced*" being alone required by the Act. It has therefore been necessary to *estimate*, in most cases, the quantity of metal contained in the ore and its value. This has made it convenient to retain the Stannary Returns, and the statement of Copper Ore sold by Public Tickettings, as usual, for this year. The returns made to the STANNARY COURT are consequently grouped together at the beginning of the book to avoid confusion; the Copper Ores sold by Public "*Tickettings*" preceding the return to the INSPECTOR. The returns as furnished to the INSPECTORS OF MINES follow, for each metalliferous ore, in the order which has been hitherto adopted.

32432. Wt. 3424. A

STANNARY RETURNS.

The Produce of the Mines and Tin Streams of CORNWALL and DEVONSHIRE which have paid dues to the Stannary Court for the year ending 25th December 1872.

* NOTE.—A considerable number of the mines making returns to the INSPECTORS have given, in strict accordance with the "Metalliferous Mines Regulation Act, 1872," the quantity of ore raised only. It should be fully understood that this is a very imperfect return. The value of the ore, or its produce, one or the other, is essential for the purposes of the "MINERAL STATISTICS." Although this is not compulsory under the Act, it has been asked for, and in many cases given. Where the value has not been given in the Inspector's return I have *estimated* it either from returns made to the MINING RECORD OFFICE,—those given by the published public sales,—from general knowledge, or from the returns made to the STANNARY COURT. All the *estimated values* of Tin and Copper Ores are printed in *italic figures* to distinguish them.

ROBERT HUNT.

1872.

LEAD AND SILVER.

NOTE.—The Returns made to the INSPECTORS of METALLIFEROUS MINES have been taken, in all cases, as the most correct. Some returns have, however, been made to the MINING RECORD Office which have not been sent to the Inspectors. In the greater number of cases the quantities of lead and silver have been estimated upon the data furnished by the returns to the STANNARY COURT, for Cornwall and Devonshire, from assays with which the MINING RECORD OFFICE has been favoured from some of the lead smelters, from the Public Sales, and from the general knowledge of the KEEPER OF MINING RECORDS.

The Total Quantity of LEAD ORE raised and sold in the UNITED KINGDOM during 1872, and SILVER obtained, was as follows:—

LEAD ORE - - - -	83,968 tons 3 cwts.
LEAD - - - - -	60,455 „ 15 „
SILVER - - - - -	628,920 ounces.

The following, computed from the Table of Prices, gives the total values as—

	£	s.
LEAD ORE - - - - - -	1,146,165	0
LEAD - - - - - -	1,209,115	0
SILVER - - - - - -	157,230	0

The Prices of Lead Ore per ton at the Holywell and Aberystwith sales, rejecting a few low and high priced parcels, were:—

Glasgow	Tharsis Sulphur and Copper Co.	15,000
Doncaster	Morris and Co.	1,200
Devonport	South Down Metal and Chemical Co.	600
	Total	253,529

Note.—The firms marked * make their precipitate into fine copper, the others sell it to copper smelters. Those marked † make sulphate of copper direct from the ore.

‡ This quantity was smelted by Messrs. H. L. Pattinson in the usual way; they have no extraction works.

A considerable quantity of the oxide of iron known as "Purple Ore" (which is the residue of the burnt pyrites after the copper is extracted) is used in blast furnaces at Palmer's Shipbuilding and Iron Co., Newcastle, the Ditton Brook Iron Co. near Warrington, and the Darlaston Steel and Iron Co., Staffordshire; the remainder, say 160,000 tons, was used as fettling ore for puddling furnaces; it being in a powder does not require grinding, same as Hematite; the per-centage of iron depends on what pyrites it is made from; when Mason's pyrites* is used it contains about 67 per cent. metallic iron, when Tharsis about 62 per cent., and Bintron 66 per cent.

* Analysis of Purple Ore (Oxide of Iron) made from Mason's Pyrites.

Sesquioxide of Iron	96·00 = 67 % metallic iron.
Lead (as sulphate)	·75
Copper	·20
Sulphur	·36
Lime	·40
Insoluble Residue	2·11
Cobalt, Arsenic, and Chlorine	Traces.
Phosphorus	None.
Soda	·10
Total	99·92

N.B.—The ore as sold usually averages about 15 per cent. moisture.

1872.

PIG IRON MANUFACTURE.

IRON ORE.—The total quantity of IRON ORE raised in the United Kingdom, as shown in the preceding Returns, amounted to

15,584,857 tons.

FOREIGN ORES imported - - -	801,503 tons.
"BURNT ORES" (Iron Pyrites imported 253,259) used as Oxide, *estimated* - - -	153,529 „
Total - - -	955,032

Total quantity of IRON ORE returned as smelted in GREAT BRITAIN, 16,539,889 tons.

NUMBER OF FURNACES IN BLAST.

England - - - - -	449¾
Wales - - - -	122¼
Scotland - - - - -	130
Total -	702

PIG IRON produced and COAL returned as used in its manufacture in the Year 1872.

	Pig Iron.	Coal.
	Tons.	Tons.
England - -	4,594,614	11,388,342
Wales - -	1,057,315	2,607,887
Scotland - -	1,090,000	3,215,500
Total - -	6,741,929	17,211,729

When COKE has been given in the return it has been computed as COAL.

MINERAL STATISTICS

FOR THE YEAR 1872.

PART II.

COAL, EARTHY MINERALS, &c.

NOTE.—In consequence of the restrictions placed upon the Returns of Produce made by the COAL OWNERS to the INSPECTORS by the following paragraph of clause 38 of "The Coal Mines Regulation Act, 1872," the responsibility of the correctness of the quantities given this year rests entirely with the Inspectors of Collieries.

"The Secretary of State may publish the aggregate results of such returns with respect to any particular county or Inspector's district, or any large portion of a county or Inspector's district, but the individual return shall not be published *without the consent of the person making the same*, or *the owner of the mine to which they relate*, and no person except an Inspector or Secretary of State shall be entitled, *without such consent*, to see the same."

SUMMARY OF COAL PRODUCE OF THE UNITED KINGDOM, AS RETURNED TO THE INSPECTORS,

FOR 1872.

	Tons.
NORTH DURHAM, NORTHUMBERLAND, AND CUMBERLAND	13,010,000
SOUTH DURHAM	17,395,000
YORKSHIRE	14,576,000
DERBYSHIRE, NOTTINGHAMSHIRE, WARWICKSHIRE, LEICESTERSHIRE	10,657,100
STAFFORDSHIRE, SOUTH, AND WORCESTERSHIRE	10,550,000
STAFFORDSHIRE, NORTH, CHESHIRE, SHROPSHIRE	6,327,188
LANCASHIRE, NORTH AND EAST	9,363,236
WEST LANCASHIRE AND NORTH WALES	9,000,000
GLOUCESTERSHIRE, SOMERSETSHIRE, MONMOUTHSHIRE	7,000,000
SOUTH WALES	10,131,720
SCOTLAND, EAST	9,046,814
SCOTLAND, WEST	6,336,795
IRELAND*	103,463
Total Produce of the UNITED KINGDOM	123,497,316

* Estimated. The Act for Ireland does not come into operation until the 1st day of January 1874.

Cornish Silver Lead Smelting Co. (Limited), Point, Truro.
Peter Glover and Robinson, Widnes Lead Works, near Warrington.
Adam Eyton, Llanerchymor, Holywell.
The Cambrian White Lead Company, Brymbo, near Wrexham.
Walker, Parker, and Company, Dee Bank, Bagilt, and Newcastle.
Governor and Company of Lead Smelters, Nenthead, Alston Moor.
W. B. Beaumont, Allendale, Alston Moor.
Benjamin Bagshaw, Eyam, near Bakewell.
Barker and Rose, Alport, Bakewell, and Sheffield.
Joseph Wass and Company, Lea Lead Works, Matlock Bath.
Snailbeach Lead Company, near Shrewsbury.
Pontesford Smelting Company.
Meerbrook Lead Works (Wass and Co.), Meerbrook, Matlock Bath.
Gibbs and Company, Bonsale Dale, Matlock.
William Sperry, Via Gellia Lead Works, Cromford, Matlock Bath.
Robert Howe Ashton, Castletown, Derbyshire.
J. Fairburn and Company, Middleton Dale and Bradwell.
T. Wilson and Company.
E. Backhouse, Darlington.
Greenside Mining Company, Penrith.
The Keld Head Mining Company, Wensleydale.
George York, Pateley Bridge.
Duke of Devonshire, Grassington.
The Duke of Buccleuch, Wanlock Head.
The Lead Hills Mining Company, Lead Hills.
The Hurst Mining Company, Hurst.
Lister, Robinson, and Company, Grinton Moor.
R. M. Jaques and Company, Arkengarthdale.
R. M. Jaques and Company, Old Gang.
The Blakethwaite Lead Company, Blakethwaite.
R. Milner and Company, Belde Hill.
The Swaledale Lead Company, West Swaledale.
Charterhouse, Blagdon, Bristol.
Mendip Mining Company near Wells.
Waldegrave Lead Smelting Company (Limited), Mendips, near Wells.
East Harptree Lead Works (Limited), East Harptree, Bristol.
St. Cuthbert Works, Mendips, near Wells.
The Mining Company of Ireland (Limited), Dublin.

SILVER AND GOLD.

Vivian and Sons, Swansea.
Williams, Foster, and Company, Morfa Silver Works, Swansea.
Johnson, Matthey, and Company,* Hatton Garden, London.

ZINC.

Vivian and Sons, Swansea.
William Marsden, Oldland Hall, near Bristol.
Kenrick and Son, Wynn Hall, Spelter Works, Ruabon.
Charles Titterton, Phœnix Zinc Works, Warrington Junction.
Dillwyn and Company, Swansea.
J. Collingborne, Spelter Works, Warmley, Bristol.
Joseph Thompson, Spelter Works, Carlisle.
Ryland Brothers, Warrington.
T. Gilby.
Joseph Wethered, Bristol.
Richardson and Company.
Jersey Smelting Company, Morriston, Swansea.

* Also smelters of antimony, quicksilver, and bismuth.

PYRITES PRECIPITATE COMPANIES.

Duncan McKechnie, St. Helen's.
The Widnes Metal Company, Widnes.
The Tharsis Sulphur and Copper Company, Widnes.
" " " Newcastle.
" " " Birmingham.
" " " Glasgow and Cardiff.
N. Mathieson and Company, Widnes.
The Runcorn Soap and Alkali Company, Runcorn.
Newton Heath Reduction Company, Manchester.
Muspratt Brothers and Huntley, Flint.
The Mostyn Copper Company, Mostyn.
Solomon Mease and Son, Newcastle.
William Russell and Company, Newcastle.
J. and W. Allan, Newcastle.
The Bede Metal Company, Newcastle.
W. Hunt and Sons, Leabrook, Wednesbury.
William Hunt and Company, Castleford.
H. Blair and Company, Kearnsley, Bolton, Lancashire.
William Haslam, Bolton, Lancashire.
Steel and Company, Runcorn.
Morris and Company, Stockwith-on-Trent.

ARSENIC.

Cornwall Arsenic Company, Hayle and Bissoe Bridge, Thomas Willis F
Managing Partner, Marazion, Cornwall.
Devon Great Consols Mining Company (Limited), Tavistock.
J. B. Drayson and Company, Harrowbarrow, Callington.
English Arsenic Company, Roseworthy, Gwinear, Cornwall.
J. J. Rayner, Morriston, Swansea.
A. C. Hadland, Swansea.

BARYTES MANUFACTURERS.

Pegg, Harper, and Company, Derby.
Ellam, Jones, and Company, Derby.
Stevens Brothers, Matlock Bath.
Mr. Garton, Lumsdale, Matlock Bridge.
Mineral Paint Company, Cromford, near Matlock Bath.
Wm. Hawley, Bonsall, near Matlock Bath.
E. Brown, Bonsall, near Matlock Bath.
Hegginbotham, Stoney Middleton, near Sheffield.
Middleton Dale Barytes Company, Stoney Middleton, near Sheffield.
White and Company, Chapel-en-le-Frith, near Stockport.
Hegginbotham, Whaley Bridge, near Stockport.

NICKEL AND COBALT.

H. Hussey Vivian, M. P., Swansea.
Stephen H. Barker, Birmingham.
Evans and Askin, Birmingham.
W. Webb and Company, Aston, near Birmingham.
J. H. Williamson, Stoke-upon-Trent.
Rawlins and Son, Liverpool.

GOLD AND SILVER ORE SMELTERS.

Vivian and Sons, Swansea.
Williams, Foster, and Company, Swansea.

SILVER ORE SMELTERS.

Vivian and Sons, Swansea.
Williams, Foster, and Company, Swansea.
Nevill, Druce, and Company, Llanelly.
Burry Port Smelting Company, Pembury.
The Mining Company of Ireland.

THE MINING RECORD OFFICE.

Considerable loss of capital has frequently resulted attempts to mine in localities, where a little knowledge of had been previously done would have shown there was but s prospect of success. Through ignorance of the existence exact extent of old and abandoned mine-workings, great da to the miner is frequently incurred, and human life been often sacrificed. The great object in the preservati the plans and sections of mines and collieries is the prevei of such loss of property and sacrifice of life.

A large collection of these records of our subterranean o tions are deposited, and important statistical details sho the real value of all our mines are kept, in this Office, u the superintendence of the Keeper of the Mining Records. are made available for the instruction of students, for the of the Geological Survey, and they may be consulted by ar the public who are interested in the working of the mi productions of the United Kingdom.

Another and perhaps the most important object of this is the annual publication of the "Mineral Statistics of the Ur Kingdom."

It should be understood that any contributions of draw maps, plans, or sections, of either abandoned or active m will be valued, and returns of mineral produce are earn but respectfully solicited.

Keeper of Mining Records.—ROBERT HUNT, F.R.S.

Assistants { RICHARD MEADE. J. B. JORDAN.

NOTICE.

The "MINERAL STATISTICS" for 1873 are issued nearly two months earlier than the volume published last year. This has been effected by persevering industry, on the part of the Keeper of Mining Records and his assistants; seconded by the liberal consideration of the colliery and mine owners, who have furnished voluntary returns, in addition to those which are compulsory under the new Acts of Parliament.

In my "Notice" affixed to the "MINERAL STATISTICS" published last year, I expressed my hope "that some well considered plan for overcoming the difficulty of requiring two sets of returns," would be adopted. It has not yet been found practicable to effect this: therefore, until the returns furnished to the Inspectors can be made available for the purposes of this publication, it will be necessary for the Keeper of Mining Records to trespass on the indulgence of all who are interested in securing a correct record of the annual progress of our mineral industries.

ANDREW C. RAMSAY,
Director General.

Since the "Mineral Statistics" for 1873 has been put to press, the Home Office has forwarded to the Mining Record Office the following returns made to the Inspector, November 14th, 1874.

The difference in excess of those printed are here stated, and new returns given.

INTRODUCTION.

THE collection of the returns for the MINERAL STATISTICS for 1873 has been attended with considerable difficulty, the causes mentioned in the "Introduction" to the volume for 1872 remaining unchanged. Notwithstanding that the returns required for 1873 from the collieries and metalliferous mines,—under the two new Acts,—had already been applied for by, and in most cases made to, the Inspectors, I received authority to solicit from the colliery and mine owners a continuation of that confidence which has enabled me for twenty-five years to compile annual returns of our mineral wealth, which have been admitted to be of great value. The result of this application for voluntary returns has been pleasingly successful. Some persons have seriously complained of this second application; a few have failed to reply to it. Many, however, have not only given the information sought for in useful detail, but have materially aided the inquiry by their influence in their own districts. To these I am under most especial obligations.

The value of all statistics is determined by their accuracy. It appears necessary, therefore, to state distinctly the sources from which the "Mineral Statistics" have been obtained.

1. *The Metalliferous Mines.*—The returns made to the Inspector for Cornwall, Devonshire, and Somersetshire have been deposited by the HOME SECRETARY in this office. These have, of course, been used; but as only the ore raised is required by the Act, many of the mines have given this alone. Therefore, the produce for metal, and the value, had still to be ascertained.

This has been done by obtaining the returns made to the STANNARY COURT and to the DUCHY OF CORNWALL, and by carefully examining the "Ticketing Papers" of the copper ore sales in Cornwall and at Swansea. This office has obtained in addition returns from a large number of the mines of Cornwall and Devonshire, and from tin streams and open workings, which do not come under the operation of "*The Metalliferous Mines Regulation Act*, 1872."

The returns of production from all the Mines in other parts of

the United Kingdom have been obtained, as they have alway hitherto been, by my direct application for them.

2. *The Collieries.*—To the largest number of the coal owne of the United Kingdom a circular was sent (a copy is give below),* soliciting a return of the coal raised from their collieri in 1873, and other information. Two thirds of the circula issued were promptly returned, with the questions most full answered. Several Coal Mining Associations furnished me, i confidence, with exact information; and from the overseers several parishes I have received similar assistance. In additio the production of large districts, collected with great care, w placed at my disposal. The information thus obtained h enabled me to compute, with accuracy, the production of collieri amounting to more than one hundred and twenty million tons.

All the great coal-carrying railways of the United Kingdo and several of the canals, have furnished the most detailed return of the coal carried from each coalfield, and its distributio frequently giving, in confidence, the collieries from which it w obtained. All the shipments of coal, both to Foreign parts an Coastwise, are furnished by the order of the House of Common

---

* SIRS, Mining Record Office.

The third paragraph of Clause 38 of the "*Coal Mines Regulation Act*, 1872, prevents my seeing the return which you will have made to the Inspector Collieries. I am, therefore, reluctantly compelled to solicit your obliging attentio to the annexed questions, to enable me to produce THE MINERAL STATISTICS OF TH UNITED KINGDOM FOR 1873 with the desired accuracy.

The replies with which you may favour me will be regarded *as strictly confidentia* and they will be used only *in strict obedience with the Act*, to enable me to compu "The aggregate result of such returns with respect to any particular county o Inspector's district."

These aggregates will be published, as they have hitherto been since 1854, in th "Mineral Statistics," and I hope a continuance of that confidence which the co interests of this country have constantly shown will enable me to give a satisfactor return, at an early date, of the production of coal and other minerals for 1873.

I am, Sirs,
Most faithfully yours,
ROBERT HUNT,
Keeper of Mining Records.

MINERAL STATISTICS FOR 1873.

1. Name and situation of Colliery.
2. Name of the Owner, or of the Firm, working the same.
3. The quantity of Coal raised in 1873, *in Statute Tons.*
4. The quantity of Slack raised in 1873, *in Statute Tons.*
5. Prices at Pit Bank.
6. Quantities of other Minerals raised in 1873.
   Iron Stone.
   Lime Stone.
   Fire Clay.
   Oil Shale.

Any information as to the distribution of Coal, &c., will be valuable.

and all the collieries sending coal to within the London district are given in the city of London returns. Nearly all the iron masters have furnished me with the quantities of coal used in their works from their own collieries, or purchased from others. From the information thus obtained, I have been enabled to compute that about seven million tons of coal were produced beyond the quantity named above. But I desire this to be clearly understood to be *an estimate*, although, I am satisfied, a fairly exact one.

3. *Smelting Works.*—As already stated, the owners of blast furnaces, of mills and forges, and of tin-plate works have responded most freely to the application made from this office; and to the smelters of tin, copper, lead, and zinc, and to the proprietors of metal precipitating works, I am under considerable obligations for much information.

4. *Earthy Minerals.*—From the liberal way in which the proprietors of clay works, barytes manufacturers, and others, have supplied returns, I am enabled to give additional matter in the present volume.

I desire in confirmation of these remarks to give the following details connected with the distribution of our coal in 1873.

SUMMARY of the Railway and Canal Distribution of Coal in 1872 and 1873.

GENERAL SUMMARY.

	1872.	1873.
	Tons.	Tons.
COAL exported to Foreign Countries - -	12,712,213	12,077,507
COKE do. do. (computed as Coal) - - - - -	390,628	356,305
PATENT FUEL - - - - -	207,241	278,410
	13,310,082	12,712,222
DECREASE - -	597,860	
COAL sent Coastwise - - - -	10,119,420	10,448,464
COKE do. (as Coal) - -	24,325	28,477
PATENT FUEL - - - - -	19,061	28,630
	10,162,806	10,505,571
INCREASE - -	342,765	
Actual Decrease in 1873, including PATENT FUEL, not included in the Detailed Statement - -	255,104 tons.	

In the movement of our Coal we find, therefore, that there has been an increase in the quantities carried—

	Tons.
By Railways and Canals, of - - -	4,610,180
And a falling off in our shipments of Coal of -	255,104
There being, therefore, a total increase in the quantity of Coal carried by RAILWAYS, CANALS, and by SEA, of - - -	4,355,076

The following attempt has been made to compile a table showing how the coal raised has been used. The Metallurgical Returns are based upon information received from the smelters. The coal used on railways is computed from information furnished to the Board of Trade of the miles travelled by trains, and the quantity of coal used per mile is the average of several published returns.

The other estimates are founded principally upon the data obtained by me for the Royal Coal Commission, corrected by recent inquiries.

L used in SMELTING ORES, Refining, Desilverizing, and Manufacture of Crude Metals and Bar Iron in the United Kingdom.

Other Metals (*Estimated*)	—	5,000
Total Value of Metals produced from British Ores in 1873		21,409,878

TOTAL VALUE of the METALS produced; COAL and other MINERALS raised, in 1873.

	£
METAL, value of, as above	21,409,878
COAL	47,629,787
MINERALS, Earthy, &c.	1,681,834
TOTAL VALUE	70,722,992

As I have only been enabled to produce these returns by the liberal assistance of our colliery owners, mine proprietors, agents, and others, I feel it to be my duty to express my sincere thanks to them. My obligations to those gentlemen who have aided me in computing the production of coal in their own districts are many. I am no less indebted to those Inspectors of collieries and metalliferous mines who have, in the most friendly manner, assisted my enquiries to the limits of the restrictions, as to coal returns especially, under which they labour. To these, and to the secretaries and managers of our railways and canals, from whom I have received the most courteous attention, and information, which was prepared for my use by the expenditure of much valuable time; I must also tender my thanks, as a small acknowledgment of the liberal aid they have given to the objects of the Mining Record Office.

ROBERT HUNT, F.R.S.,
Keeper of Mining Records.

Mining Record Office,
Museum of Practical Geology,
Jermyn Street, London,
October 1874.

TIN.

The PRODUCE of the MINES and STREAMS of CORNWALL and DEVONSHIRE, according to Returns obtained from the SMELTERS.

Captain Boyens, Captain Williams — *On the beach at Gwithian*	—

For this we are indebted to the *Western Daily Mercury*, the Mining intelligence of which is usually marked by extreme correctness.

On the river flowing from HUEL BASSETT to PORTREATH BEACH are the following works which occur in the order given :—

1. John Daw, 3 streams.
2. Capt. R. Pearce, of Dolcoath.
3. 4. 5. Capt. James Evans, of Nance.
6. Evans, Jenkins, & Co.
7. Capt. Stevens.
8. Capt. J. Evans, of Nance.
9. Evans, Jenkins, and Co.
10. Paynter, Hartley, and Co.
11. Messrs. J. Fox and Peters.
12. Messrs. J. Fox and Sedgman.
13. Capt. Hocking.
14. Stephen Evans, on Portreath beach.

On the river leaving HUEL ROSE, NORTH DOWNS, &c., towards BRIDGE :—

1. Christopher Harris.

1873.

TIN PRODUCE of AUSTRALIA according to unofficial Returns.

NEW SOUTH WALES, from the commencement of the exportation to the present time :—

	Ore.	Smelted Ingots.
1872,	20,682 cwts.	1,838 cwts.
1873,	78,300 „	20,595 „
1874,	19,057 „ (*Six months*).	45,661 „ (*Six months*).

QUEENSLAND :—

	Ore.	Ingots.
1873,	1,440 tons to London.	280 tons to London.
„	3,460 „ „ Sydney.	20 „ „ Sydney.
1874, to June,	1,520 „ „ London.	500 „ „ London.
„	1,760 „ „ Sydney.	16 „ „ Sydney.

The above returns are not official, but as they are thought to be near the truth they are given—and must be accepted for what they are worth—until official returns are received. The discrepancies between these returns and the returns made to Parliament for 1873 should be noticed.

Another non-official return gives the Australian Tin (reduced to pure metal), the ore being estimated at 70 per cent., as follows, the quantities being the imports into London in each year:—

1872.	1873.	1874.
151 tons.	2,472 tons.	5,067 tons.

COPPER.

RETURNS of COPPER ORES for CORNWALL and DEVONSHIRE.

From Mines which have made Returns to the INSPECTOR of MINES, to the STANNARY COURT, and to the MINING RECORD OFFICE.

(NOTE.—*In the returns made to the Inspector the quantity of copper in the ore has seldom been given. This does not appear at all in the returns to the Stannary Court. It has consequently been necessary to give the Ticketing Returns, that the quantity of Metallic Copper may be computed.*)

1873.

LEAD AND SILVER.

NOTE.—The Returns made to the INSPECTOR of METALLIFEROUS MINES for and Devon have been taken as the most correct. All the other returns l made to the MINING RECORD Office. In the greater number of cases the of lead and silver have been computed from assays with which the MINING OFFICE has been favoured, and from the general knowledge of the KEEPER O RECORDS.

The Total Quantity of LEAD ORE raised and sold in the UNITED KINGDOM 1873, and SILVER obtained, was as follows:—

LEAD ORE - - - - -	73,500 tons 10 cwts.
LEAD - - - - - -	54,235 „ 9 „
SILVER - - - - - -	524,307 ounces.

The following, computed from the Table of Prices, gives the total values as—

	£
LEAD ORE - - - - - - -	1,131,907
LEAD - - - - - - -	1,263,375
SILVER - - - - - - -	131,077

The Prices of Lead Ore per ton at the Holywell and Aberystwith sales, reje few low and high priced parcels, were:—

Doncaster	Morris and Co.	7,000
Devonport	South Down Metal and Chemical Co. Limited.	7,500
	Total	323,910

Note.—The firms marked * make their precipitate into fine copper, the others sell it to copper smelters. Those marked † make sulphate of copper direct from the ore.

A considerable quantity of the oxide of iron known as "Purple Ore" (which is the residue of the burnt pyrites after the copper is extracted) is used in some blast furnaces in form of blocks as well as in powder, at Palmer's Shipbuilding and Iron Co., Newcastle, the Ditton Brook Iron Co. near Warrington, and Stanton Iron Works near Nottingham; the remainder was used as fettling ore for puddling furnaces; it being in a powder does not require grinding, as Hematite does; the per-centage of iron depends on the description of pyrites from which it is made; when Mason's pyrites* is used it contains about 67 °/₀ metallic iron, when Tharsis about 62 °/₀ and Buitron 66°/₀ per cent.

* Purple Ore (Oxide of Iron) made from Mason's Pyrites, as per analysis of F. Claudet, Esq., of London.

Sesquioxide of Iron	96·00 = 67 °/₀ metallic iron.
Lead (as sulphate)	·75
Copper	·20
Sulphur	·36
Lime	·40
Insoluble Residue	2·11
Cobalt, Arsenic, and Chlorine	Traces.
Phosphorus	None.
Soda	·10
Total	99·92

N.B.—The ore as sold usually averages about 15 per cent. moisture.

TIN PLATE MANUFACTURE.

1873.

The following Firms are engaged in the production of TIN, TERNE and BLACK PLATES :—

No.	Name of Works.	Name of Firm.	Where situate.
1	Abercarne - -	Daniel Whitehouse -	Abercarne, Newport, Monmouthshire.
2	Aberdulais - -	Joshua Williams and Co.	Neath, Glamorganshire.
3	Abergavenny -	The Brynmawr Coal and Iron Co. (*Limited*).	Abergavenny, Monmouthshi
4	Abertillery -	Philip S. Phillips -	Abertillery, Newport, Monmouthshire.
5	Amman - -	Amman Iron Co. -	Swansea, Glamorganshire.
6	Avon Vale - -	Port Talbot Tin Plate Co.	Aberavon, Taibach, Glamorganshire.
7	Beaufort or Lower Forest.	Beaufort Tin Plate Co. -	Morriston, Swansea, Glamorganshire.
8	Bradley - -	Thompson, Hatton, & Co.	Bilston, Staffordshire.
9	Broadwaters -	Thompson, Hatton, & Co.	Kidderminster, Worcestersh
10	Brockmoor - -	Budd and Co. - -	Brierley Hill, Staffordshire.
11	Caerleon - -	F. Moggridge and Co. -	Newport, Monmouthshire.
12	Carmarthen -	Thomas Lester and Co. -	Carmarthen, Carmarthenshi
13	Coatbridge -	Coatbridge Tin Plate Co. (*Limited*).	Coatbridge, Glasgow.
14	Cookley - -	John Knight and Co. -	Kidderminster, Worcestersh
15	Cwm Avon -	Governor and Co., Copper Miners.	Taibach, Glamorganshire.
16	Cambrian - -	Morewood and Rogers -	Llanelly, Carmarthenshire.
17	Cwmbwrla or Swansea.	Swansea Tin Plate Co. -	Swansea, Glamorganshire.
18	Cwmfelin - -	Cwmfelin Tin Plate Co. -	Swansea, Glamorganshire.
19	Dafen - -	Phillips, Nunes, and Co.	Llanelly, Carmarthenshire.
20	Dyffryn - -	Davies, Evans, and Co. -	Morriston, Swansea, Glamorganshire.
21	Derwent - -	W. Griffiths and Co. -	Workington, Cumberland.
22	Gadly's Uchaf -	Smith and Davis -	Aberdare, Glamorganshire.
23	Garth - -	Garth Iron and Tin Plate Co.	Rhiwderno, Newport, Monmouthshire.
24	Glamorgan* -	Webb, Shakespeare, and Williams.	Pontardulais, Llanelly, Carmarthenshire.
25	Gower - -	H. Ll. Morris and Co. -	Penclawdd, Glamorganshire
26	Gwendraeth -	J. Chivers and Son -	Kidwelly, Carmarthenshire.
27	Hendy - -	Edmd. Boughton and Co. (*Limited*).	Llanelly, Carmarthenshire.
28	Holywell - -	Holywell Tin Plate Co. -	Holywell, Flintshire.
29	Hope - -	Hope Iron and Tin Plate Co.	Tipton, Staffordshire.
30	Horseley Fields -	Osier Bed Iron Co. -	Wolverhampton, Staffordshi
31	Horseley Fields or Wilden.	E. P. and W. Baldwin -	Ditto.
32	Landore - -	Landore Tin Plate Co. -	Swansea, Glamorganshire.
33	Llanelly - -	John S. Tregonning & Son	Llanelly, Carmarthenshire.
34	Llangennech -	George H. Banks and Co.	Llanelly, Carmarthenshire.
35	Llwydarth - -	Llwydarth Tin Plate Co.	Maesteg, Bridgend, Glamorganshire.
36	Lydbrook - -	Richard Thomas and Co.	Ross, Herefordshire.
37	Lydney - -	William Allaway & Sons -	Lydney, Gloucestershire.
38	Machen - -	Machen Iron and Tin Plate Co.	Newport, Monmouthshire.
39	Margam - -	Robert B. Byass and Co. -	Taibach, Glamorganshire.
40	Marshfield† -	C. Budd and Co. (*Limited*)	Llanelly, Carmarthenshire.
41	Melyn - -	Leach, Flower, and Co. -	Neath, Glamorganshire.
42	Mold* - -	The Mold Tin Plate Co. -	Mold, Flintshire.

* Not yet in operation.

† Commenced operation in October 1873.

No.	Name of Works.	Name of Firm.	Where situate.
43	Monmouth Forges	David Griffiths and Son	Taibach, Monmouth.
44	Morlais	Morlais Tin Plate Co.	Llangennech, Llanelly, Carmarthenshire.
45	Morriston	Morriston Tin Plate Co.	Swansea, Glamorganshire.
46	Parkend	Forest of Dean Iron Co.	Lydney, Gloucestershire.
47	Pentyrch & Melin Griffith.	T. W. Booker and Co. (*Limited*).	Cardiff, Glamorganshire.

THE MINING RECORD OFFICE.

Considerable loss of capital has frequently resulted from attempts to mine in localities, where a little knowledge of what had been previously done would have shown there was but small prospect of success. Through ignorance of the existence and exact extent of old and abandoned mine-workings, great danger to the miner is frequently incurred, and human life has been often sacrificed. The great object in the preservation of the plans and sections of mines and collieries is the prevention of such loss of property and sacrifice of life.

A large collection of these records of our subterranean operations are deposited, and important statistical details showing the real value of all our mines are kept, in this Office, under the superintendence of the Keeper of the Mining Records. They are made available for the instruction of students, for the use of the Geological Survey, and they may be consulted by any of the public who are interested in the working of the mineral productions of the United Kingdom.

Another and perhaps the most important object of this office is the annual publication of the "Mineral Statistics of the United Kingdom."

It should be understood that any contributions of drawings, maps, plans, or sections, of either abandoned or active mines, will be valued, and returns of mineral produce are earnestly but respectfully solicited.

Keeper of Mining Records.—ROBERT HUNT, F.R.S.

Assistants { RICHARD MEADE.
J. B. JORDAN.

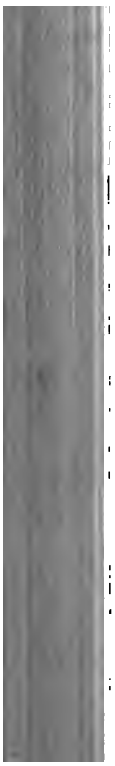
APPENDIX :—
Inspectors of Metalliferous Mines - 181
I. Metalliferous Mines of the United Kingdom - 182
II. Iron Mines of the United Kingdom - 205
III. Collieries of the United Kingdom - 219
IV. Porcelain and other Clay Works - 272
V. Smelting and Metal-extracting Works in the United Kingdom - 277



I have the satisfaction of stating that by the amende
the last session of Parliament, all returns from the Me
Mines are, in future, to be made to the Inspector of Min
1st day of February; and that arrangements have been
the Secretary of State for the Home Department, by wh
returns will be forwarded to the Mining Record Office, a
possible after they have been received from the Inspecto
HOME OFFICE.

This will facilitate much of the work of collection
years. But, as the returns made to the Inspectors are
to give only the quantities of Ore raised, the Keeper o
Records will still have to ascertain the *values* of the O
and the quantities of *Metal* produced from each mine.
ditions of the "Coal Mines Regulation Act, 1872," re
changed. Consequently, the coal-owners will be aske
extend to the Mining Record Office that obliging con
which they have hitherto shown, and make the usual
return of the produce of their collieries. The collection o
from all such mineral workings as do not come under the
of the Mines Regulation Act, from all descriptions of Ir
from other Metallurgical works, and from the Railways, wi
unchanged. With the same liberal assistance which I
hitherto afforded, I hope the Keeper of Mining Record

INTRODUCTION.

GENERAL SUMMARY

of the Returns of the Mineral Produce of the United Kingdom for 1874.

Minerals.	Quantities.	Values.
	Tons cwts.	£
Coal	125,043,257 0	45,849,194
Iron Ore	14,844,936 10	7,318,169
Copper Ore	78,521 0	336,414
Tin Ore	14,039 7	788,310
Lead Ore	76,201 12	1,024,107
Zinc Ore	16,829 16	48,195
Iron Pyrites	56,208 8	38,226
Arsenic	6,268 9	27,438
Manganese	5,778 1	29,201
Ochre and Umber	7,122 1	9,478
Wolfram	32 15	545
Bismuth	—	38
Silver Ore	2 10	20
Fluor Spar	634 10	317
Clays (Porcelain and Fire Clay)	2,436,912 0	780,159
Salt	2,306,567 0	1,153,233
Barytes	14,374 0	12,301
Coprolites, &c. and Phosphorite	149,654 0	388,290
Gypsum	66,124 0*	33,062
Other Earthy Minerals, estimated	—	3,000
Total Value of the Minerals produced in 1874		57,839,697

Metals obtained from the Ores produced in the United Kingdom in 1874.

Minerals.	Quantities.	Values.
		£
Gold	385 ozs.	1,540
Pig Iron	5,991,408 tons.	16,476,372
Copper	4,981 „	447,891
Tin	9,942 „	1,077,712
Lead	58,777 „	1,298,463
Zinc	4,470 „	106,773
Silver	509,277 ozs.	127,319
Other Metals (*estimated*)	—	3,000
Total Value of Metals produced from the Ores of United Kingdom		19,539,070

* Returned to H.M. Inspector.

TOTAL VALUE of MINERALS and METALS, COAL, &c., obtained in the UNITED KINGDOM in 1874.

METALS, value of, as above - -	£19,539,070
COAL - - - - -	45,849,194
MINERALS, Earthy, &c., as above - -	2,446,049
Total value - -	£67,834,313

This shows a decrease in the value of the metals and minerals produced from the mines of the United Kingdom in 1874, as compared with values given in the returns of 1873, of 2,888,679*l*. This falling off is on the coal and iron.

The falling off in the value of COAL being - -	£1,782,08
Do. Do. of PIG IRON - -	1,581,36
Do. Do. on other METALS -	288,98
Total *decrease* in the value of COAL and METALS	£3,652,43

while there has been an *increase* on the value of the Earthy Minerals of about 764,500*l*.

It appears desirable to state distinctly the sources from which the information contained in this volume has been obtained.

The METALLIFEROUS MINES, other than IRON.—The quantities of the ores produced from the mines of the United Kingdom have been obtained as follows:—

1. From the returns sent to the Metalliferous Mines Inspectors; but these seldom give either the *quantity of metal in the ore, or the value of the ore returned.*
2. From returns made to the MINING RECORD OFFICE in reply to circulars soliciting returns of the *minerals raised, the value of the ore sold, and the metal contained in the ore.*
3. As it relates to CORNWALL and DEVONSHIRE:—
   a. From the dues paid to the Stannary Court.
   b. „ royalties paid on TIN to the Duchy of Cornwall.
   c. „ Ticketting Papers for Copper Ore.
   d. For *Tin Streams* and open working, from returns made to MINING RECORD OFFICE.

IRON ORES.—The quantities of Iron Ore raised from mines have been taken from Returns made to the MINING RECORD OFFICE, carefully compared with those sent to the Inspectors of Mines. The Iron Ore from open workings in Northamptonshire and other places, not coming under the Metalliferons Mines Regulation Act, have been obtained by the MINING RECORD OFFICE by direct application to each individual owner.

PIG IRON, &c.—These returns are obtained from the answers sent, in confidence, by the iron-masters to the Keeper of Mining Records.

AL.—As the individual coal returns cannot, under the "Coal s Regulation Act, 1872," be published, and as the Act states "no person, except an Inspector or Secretary of State, shall be led * * to see the same," it became necessary that a circular ld be sent to every colliery in the United Kingdom, asking for turn, in confidence, of the quantity of Coal raised in 1874. se circulars were very largely replied to by the coal owners, and questions asked were fully answered. In addition to this the L TRADE ASSOCIATIONS generally rendered great assistance, and me cases issued circulars to the members of those Associations, essing their desire "that the information applied for by r. ROBERT HUNT will be promptly and accurately supplied that gentleman, so that his future publications may prove ually valuable as those which are already before the public." ddition to this the Railways carrying coal from the great ields have, at considerable trouble to their officers, furnished Office with most important information, some of which is ished; and the overseers and other authorities have rendered h assistance.

his statement will, it is hoped, sufficiently satisfy every one ested that the utmost care is taken to secure the correctness e returns in the "MINERAL STATISTICS."

esiring to test, in every way, the accuracy of the published egates of the produce of the coal-producing counties, the wing tables showing the quantities of coal send by railway, by l, or by sea, from each coal field, in 1873 and 1874, are given.

In the movement of our Coal we find, therefore, that there has been a *decrease* in the quantities carried during the year 1874—

	Tons.
By Railways and Canals of - -	2,694,621
Ship Coastwise - - - -	898,211
Total - - -	3,592,832
At the same time there has been on Coal, Coke, and Patent Fuel sent to Foreign Countries an *increase* of - -	1,309,639
Therefore the actual total *decrease* in Coal moved from the place of production was -	2,283,193

This decrease is confirmed by the diminished quantity of Coal used in domestic consumption, which in London alone amounted to 400,802 tons; and by the much smaller quantity of Coal which was employed in our Metallurgical operations, as is shown in the following table :—

COAL used in SMELTING ORES, Refining, Desilverizing, and Manufacture of METALS, in the United Kingdom.

	1873.		1874.

BAR IRON OR MERCHANT IRON	†5,409,203	18,320,830	5,223,476	18,270,150	—	50,680
TOTAL actual Decrease in the quantity of Coal used in the smelting of Metals in 1874 was - - - - -						1,401,934

* A considerable quantity of iron pyrites containing but a very small per-centage of copper (p. 24) is included in these quantities.

† This is the quantity of pig iron left for manufacture after the pig iron exported has been deducted from that made.

It remains for me to state that I believe the difference which appears between the returns as given by H. M. INSPECTORS and the MINING RECORD OFFICE arises principally from the impossibility of obtaining the returns uniformly in statute tons.

For the liberal aid which has been given to me in the prosecution of my labours, by all parties connected with our mines or collieries,—with our iron-works and other metallurgies,—with our railways and canals, I feel myself under especial obligations, and I beg to tender individually and collectively my most sincere thanks to all who have aided me in producing the MINERAL STATISTICS.

ROBERT HUNT, F.R.S.,
Keeper of Mining Records.

Mining Record Office,
Museum of Practical Geology,
Jermyn Street, London,
November 1874.

NOTE.—Since the pages 83–84 have been printed off, it has been discovered that the values given to the Red Hæmatite Iron Ores are somewhat high. In several instances the prices given for rich puddling ores were applied in computing the values of the ordinary Red Hæmatites. The total value of the Iron Ores of the United Kingdom will possibly bear a reduction of about four hundred thousand pounds.

1874.

LEAD AND SILVER.

NOTE.—The Returns of Lead Ore made to the INSPECTORS of METALLIFEROUS MINES have been generally adopted. In some few cases the returns made to the MINING RECORD OFFICE have been preferred. In nearly all cases the quantities of lead and silver have been made to the MINING RECORD OFFICE, or computed from assays with which this Office has been favoured, and from the general knowledge of the KEEPER OF MINING RECORDS.

The Total Quantity of LEAD ORE raised and sold in the UNITED KINGDOM during 1874, and SILVER obtained, was as follows:—

LEAD ORE - - - -	76,151 tons 12 cwts.
LEAD - - - - -	58,754 „ 10 „
SILVER - - - - -	509,558 ounces.

The following, computed from the Table of Prices, gives the total values as—

	£	s.
LEAD ORE - - - - - -	1,024,107	0
LEAD - - - - - -	1,298,463	0
SILVER - - - - - -	127,389	10

The Prices of Lead Ore per ton at the Holywell and Aberystwith sales during 1874, rejecting a few low and high priced parcels, were:—

Months.	Highest.			Lowest.			Mean.

	Total	329,004

Note.—The firms marked * make their precipitate into fine copper, the others sell it to copper smelters. Those marked † make sulphate of copper direct from the ore.

A considerable quantity of the oxide of iron known as "Purple Ore" (which is the residue of the burnt pyrites after the copper is extracted) is used in blast furnaces in form of blocks as well as in powder, viz., at Palmer's Shipbuilding and Iron Co., Newcastle, the Ditton Brook Iron Co. near Warrington, Alfred Hickman, Spring Vale Furnaces, Deepfields, and Corbyn's Hall Iron Works, near Dudley; the remainder is used as fettling ore for puddling furnaces; it being in a powder does not require grinding, as Hematite does; the per-centage of iron depends on the description of pyrites from which it is made; when Mason's pyrites* is used it contains about 67 °/₀ metallic iron, when Tharsis about 62 °/₀, and Buitron 66 °/₀.

* Purple Ore (Oxide of Iron) made from Mason's Pyrites, as per analysis of F. Claudet, Esq., of London.

Sesquioxide of Iron	96·00 = 67 °/₀ metallic iron.
Lead (as sulphate)	·75
Copper	·20
Sulphur	·36
Lime	·40
Insoluble Residue	2·11
Cobalt, Arsenic, and Chlorine	Traces.
Phosphorus	None.
Soda	·10
Total	99·92

N.B.—The ore as sold usually averages about 15 per cent. moisture.

IMPORTS OF PYRITES in the Year 1874.

Distribution of Cumberland Iron Ore in 1874.

By Sea, by Maryport and Carlisle Railway, and by Furness Railway.

The Whitehaven Iron Ore was sent to the following places:—

		Tons.
To all places	by ship	113,191
Millom, Carnforth, Lancashire, and the South	by rail	101,321
Scotland	by rail	69,402
Newcastle and Middlesbro' District	by rail	63,385
Workington, Maryport, Harrington, and Cleator District	by rail	554,368
Total of Whitehaven Ore		901,667

Distribution of Whitehaven Ore by Furness Railway, as by Return furnished.

	Tons.
Shipped at Whitehaven	110,717
Sent by rail	53,911
To Furnaces in District, by rail	508,849
Total	673,477

Note.—In the Returns for 1873 the total Returns of Cumberland should have been:—

	Tons.
Whitehaven Ore	1,021,690
Hodbarrow	203,791
Alston Moor, &c.	4,346
Eskdale	6,170
Total	1,235,997

TIN PLATE MANUFACTURE.

1874.

The following Firms are engaged in the production of TIN, TERNE, and BLACK PLATES :—

(The returns in nearly all cases call attention to the fact that about 30 works were idle for three months, in consequence of a strike on the part of the men, who at last had to resume work at the old prices.)

No.	Name of Works.	Name of Firm.	Where situate.
1	Abercarne - -	Daniel Whitehouse -	Abercarne, Newport, Monmouthshire.
2	Aberdulais - -	Joshua Williams and Co.	Neath, Glamorganshire.
3	Abergavenny -	The Brynmawr Coal and Iron Co. (*Limited*).	Abergavenny, Monmouthshire.
4	Abertillery -	Philip S. Phillips -	Abertillery, Newport, Monmouthshire.
5	Amman - -	Amman Iron Co. -	Swansea, Glamorganshire.
6	Avon Vale - -	Port Talbot Tin Plate Co.	Aberavon, Taibach, Glamorganshire.
7	Beaufort - -	Beaufort Tin Plate Co. -	Morriston, Swansea, Glamorganshire.
8	Bradley* - -	Thompson, Hatton, & Co.	Bilston, Staffordshire.
9	Broadwaters -	Thompson, Hatton, & Co.	Kidderminster, Worcestershire.
10	Brockmoor - -	Budd and Co. - -	Brierley Hill, Staffordshire.
11	Caerleon - -	F. Moggridge and Co. -	Newport, Monmouthshire.
12	Carmarthen -	Thomas Lester and Co. -	Carmarthen, Carmarthenshire.
13	Coatbridge -	Coatbridge Tin Plate Co. (*Limited*).	Coatbridge, Glasgow.
14	Cookley - -	John Knight and Co. -	Kidderminster, Worcestershire.
15	Cwm Avon -	Governor and Co., Copper Miners.	Taibach, Glamorganshire.
16	Cambrian - -	Morewood and Rogers -	Llanelly, Carmarthenshire.
17	Cwmbwrla or Swansea.	Swansea Tin Plate Co. -	Swansea, Glamorganshire.
18	Cwmfelin - -	Cwmfelin Tin Plate Co. -	Swansea, Glamorganshire.
19	Dafen - -	Phillips, Nunes, and Co.	Llanelly, Carmarthenshire.
20	Dyffryn - -	Davies, Evans, and Co. -	Morriston, Swansea, Glamorganshire.
21	Derwent - -	W. Griffiths and Co. -	Workington, Cumberland.
22	Gadly's Uchaf -	Smith and Davis -	Aberdare, Glamorganshire.
23	Garth - -	Garth Iron and Tin Plate Co.	Rhiwderno, Newport, Monmouthshire.
24	Glamorgan -	Webb, Shakespeare, and Williams.	Pontardulais, Llanelly, Carmarthenshire.
25	Gower - -	H. Ll. Morris and Co. -	Penclawdd, Glamorganshire.
26	Gwendraeth -	J. Chivers and Son -	Kidwelly, Carmarthenshire.
27	Hendy - -	Edmd. Boughton and Co. (*Limited*).	Pontardulais, Carmarthenshire.
28	Holywell - -	Holywell Tin Plate Co. -	Holywell, Flintshire.
29	Hope - -	Hope Iron and Tin Plate Co.	Tipton, Staffordshire.
30	Horseley Fields -	Osier Bed Iron Co. -	Wolverhampton, Staffordshire.
31	Horseley Fields or Wilden.	E. P. and W. Baldwin -	Ditto.
32	Landore - -	Landore Tin Plate Co. -	Swansea, Glamorganshire.
33	Llanelly - -	John S. Tregonning & Son	Llanelly, Carmarthenshire.
34	Llangennech -	George H. Banks and Co.	Llanelly, Carmarthenshire.
35	Llwydarth - -	Llwydarth Tin Plate Co.	Maesteg, Bridgend, Glamorganshire.
36	Lydbrook - -	Richard Thomas and Co.	Ross, Herefordshire.
37	Lydney - -	William Allaway & Sons -	Lydney, Gloucestershire.

* In addition to the tin, terne, and black plates returned they manufacture considerable quantities of "tin sheets" of considerable size, up to 120 × 36 inches.

o.	Name of Works.	Name of Firm.	Where situate.
8	Machen - -	Machen Iron and Tin Plate Co.	Newport, Monmouthshire.
9	Margam - -	Robert B. Byass and Co. -	Taibach, Glamorganshire.
0	Marshfield -	C. Budd and Co. (*Limited*)	Llanelly, Carmarthenshire.
1	Melyn - -	Leach, Flower, and Co. -	Neath, Glamorganshire.
2	Mold -	The Mold Tin Plate Co. -	Mold, Flintshire.
3	Monmouth Forges	David Griffiths and Son -	Taibach, Monmouth.
4	Morlais - -	Morlais Tin Plate Co. -	Llangennech, Carmarthenshire.
5	Morriston - -	Morriston Tin Plate Co. -	Swansea, Glamorganshire.
6	Parkend - -	Forest of Dean Iron Co. -	Lydney, Gloucestershire.
7	Pentyrch & Melin Griffith.	T. W. Booker and Co. (*Limited*).	Cardiff, Glamorganshire.
8	Pontardawe -	W. Gilbertson and Co. -	Swansea, Glamorganshire.
9	Pontheer - -	John Jenkins and Co. -	Caerleon, Monmouthshire.
0	Pontnewynydd -	R. Conway and Co. -	Newport, Monmouthshire.
1	Pontrhydyrun -	Conway Brothers - -	Ditto.
2	Pontymister -	Banks and Co. - -	Ditto.
3	Pontypool -	Pontypool Iron and Tin Plate Co.	Pontypool, Monmouthshire.
4	Redbrook - -	Redbrook Tin Plate Co. -	Monmouth, Monmouthshire.
5	Rugeley - -	Vacant - - -	Rugeley, Staffordshire.
6	Star - -	Star Iron and Tin Plate Co.	Ryders Green, West Bromwich, Staffordshire.
7	Stour Vale - -	Crowther, Brothers, and Morgan.	Kidderminster, Worcestershire.
8	The Forest - -	The Forest Tin Plate Co.	Morriston, Swansea, Glamorganshire.
9	The Old Castle -	The Old Castle Iron and Tin Plate Co. (*Limited*).	Llanelly, Carmarthenshire.
0	Tividale - -	Budd and Co. - -	Tipton, Staffordshire.
1	Treforest - -	Treforest Tin Plate Co. -	Pontypridd, Glamorganshire.
2	Tydee - -	John Lewis and Co. -	Newport, Monmouthshire.
3	Upper Forest -	Edward Bagot and Co. -	Swansea, Glamorganshire.
4	Vernon - -	David Morris and Co. -	Briton Ferry, Glamorganshire.
5	Worcester - -	Llansamlet Tin Plate Co.	Middle Forest, Swansea, Glamorganshire.
6	Ynispeullwch -	Ynispeullwch Tin Plate Co.	Swansea, Glamorganshire.
7	Ystpitty - -	Jacob Chivers and Son -	Llanelly, Carmarthenshire.
8	Ystalyfera -	Ystalyfera Iron Co. -	Swansea, Glamorganshire.

The Returns received from Tin Plate Works have been as follows:—

Number of boxes of TIN and TERNE PLATES -	1,167,892
Ditto Black plates - -	36,684
Total number of boxes - - -	1,204,576

Actual weight of the whole *returned*, 62,268 tons.

The Tin Plate Works which have not made returns are *estimated* as llows:—

In the estimation of these I have been greatly assisted by gentlemen who e connected, and intimately acquainted, with the Tin Plate Manufacture.

Total *estimated number* of boxes of Tin and Terne and Black plates - -	1,325,000
Actual number of boxes of Tin and Terne and Black plates *returned* as above -	1,204,563
Total number of boxes of Tin, Terne, and Black plates made in the United Kingdom in 1874 - - - -	2,529,563

Total - -	16,788,661

RAILWAY DISTRIBUTION.

1874.

By NORTH BRITISH RAILWAY for Twelve Months ending January 31st, 1875.

Coal received from the following Districts :—

	Tons.
CANOBIE - - - -	46,082
FIFESHIRE - - -	914,076
MONKLANDS - - - -	2,303,084
PLASHETTS - - -	45,410
THE LOTHIANS - - -	438,483
OTHER COLLIERIES ON BORDER SECTION*	94,721
Total Coals carried -	3,841,856

* This quantity is made up as follows :—

	Tons.
Langholm - - -	4
Abbey - - - -	117
Riccarton - - -	11,020
Gretna - - -	179
Carlisle - - -	30,142
Silloth - - -	113
Falston - - -	192
Bellingham - - -	282
Reedmouth - - -	6,799
Woodburn - - -	110
Scotsgap - - -	1,097
Morpeth - - -	4,605
Wall - - - -	39,922
Hexham - - -	139
Total - - -	94,721

By THE CALEDONIAN RAILWAY :—

STATEMENT showing the Tonnage of Coal and Dross produced from the Pits on the Caledonian Line.
